Job Involvement

- 47% of employees who leave rate Job Involvement as a 1 or 2
- 28% of employees who stay rate Job Involvement as a 1 or 2

**Marital
Status**

Overtime

**Model
Results**

Marital Status

- Single employees have a 26% attrition rate
- Divorced employees have a 6% attrition rate

Overtime

- 32% of employees who work overtime leave
- 10% of employees who do not work overtime leave

kNN Model Results

- $k = 3$
- Variables: Job Involvement, Job Role, Marital Status, Overtime
- Accuracy: 87%
- Sensitivity: 97%
- Specificity: 32%

Variables Included:

- Age
- Business Travel
- Distance From Home
- Environment Satisfaction
- Job Involvement
- Job Level
- Job Role
- Job Satisfaction
- Marital Status
- Number of Companies Worked At
- Overtime
- Percent Salary Hike
- Performance Rating
- Relationship Satisfaction
- Total Working Years
- Work Life Balance
- Years at the Company

Company

Model
Results

Stock Option Level

70% of employees who leave have a level 1 stock option

Years at the Company

Employees who have worked at the company 1 year have a 33% attrition rate, compared to the overall attrition rate of 20%

Logistic Regression Model Results

- Accuracy: 91%
- Sensitivity: 97%
- Specificity: 62%

Correlation Matrix

**Model
Results**

Multiple Linear Regression Model Results

- Variables: Job Level, Years at Company + Total Working Years, and Age
- 70%/30% cross validation
- Monthly Income =
 $-\$2,333 + 3847 \cdot \text{Job Level} + 14 \cdot \text{Years} + 16 \cdot \text{Age}$
- 91% of the variation in Monthly Income can be explained by the model
- RMSE = \$1,418
